Values Reflection

In the space below, write a reflection from today's Values Activity. Put some time into your thoughts and be sure to include:

- Your three top values
- Was it hard for you to "throw away" some of the values?
- How did it make you feel when some people threw away values that you thought were important?
- How does this activity and the values you chose relate to the Stem Cell Research issue?
- Are there any other issues that you can relate your values to?
